

SPECIFICATION

MODEL DPE – ELECTRIC CONVEYOR OVEN HOOD

The Duo-Aire hood shall be a Type II hood constructed to exhaust cooking contaminants from single or multiple deck electric conveyor ovens. Hood shall be constructed of 300 series stainless steel and shall include two (2) individual hoods connected by a single piece of duct providing a single center installed exhaust collar. The hoods and duct length shall be determined based on the specific oven model provided and shall include aluminum baffle filters installed in each hood. Each hood shall be 18 inches deep by 24 inches high by width of oven. Clean out door shall be provided in center of duct for cleaning. Hoods and duct shall be assembled in factory and shipped as a single piece.

Exhaust CFM shall be 50-150 CFM/ft. of oven up to four decks in accordance with cataloged data.
